Digital 9th International Conference on UNESCO Global Geoparks

Jeju island, Republic of Korea

12-16 December 2021

DEADLINE FOR ABSTRACT SUBMISSION: 15 November 2021
The GGN Executive Board encourages all colleagues to submit your abstracts for the DIGITAL 9th International Conference on UNESCO Global Geoparks which
will be organized from 12th to 16th December 2021 in Jeju island, Republic of Korea.

The International Conference on UNESCO Global Geoparks is the most important event of our Network.

The Global Geoparks Network encourages all UNESCO Global Geoparks representatives and Geopark professionals from all over the world to participate in this International Conference on UNESCO Global Geoparks. The Conference gives all Geoparks the opportunity to connect, discuss best practices derived from successful projects, be immersed in diverse cultures, network and build stronger and effective partnerships and collaborations.

**ABSTRACT SUBMISSION DEADLINE** is 15th of November 2021

UNESCO GLOBAL GEOPARKS

26th UN CLIMATE CHANGE CONFERENCE OF THE PARTIES (COP26)

31 October – 12 November 2021
UNESCO Global Geoparks contribution to the fight against Climate Change include a variety of activities such as: Greening of Geopark's buildings and infrastructure to become of zero emission, Reforestation activities and measures against wild forest fires in Geopark territories, Awareness raising activities for the broad public through lectures, workshops and events, Educational programmes on Climate Change in Geoparks, Exhibitions aiming to Climate Change understanding, Publications on Climate Change adaptation and many more.....

Global Geoparks Network organised a website and social media and presented some of the activities taking place in UNESCO Global Geoparks on Climate Change mitigation and adaptation.

The Earth Sciences and Geo-hazards Risk Reduction Section organised a social media campaign during the period of the 26th UN CLIMATE CHANGE CONFERENCE OF THE PARTIES (COP26), highlighting the good examples and practices of UNESCO Global Geoparks to Climate change mitigation and adaptation. Please find below the web articles that was developed by the Earth Sciences and Geo-hazards Risk Reduction Section on the contribution of UNESCO Global Geoparks to Climate Change action:
